

## CONSENT FORM

### Description of the Treatment:

Sculptique™ is a non-invasive, therapeutic device intended for stimulation of neuromuscular tissue. The neuromuscular stimulation results in effects such as: pain relief, relaxation of muscle spasms, prevention/retardation of disuse atrophy, increasing local blood circulation, muscle re-education, firming and tonisation, and maintaining or increasing range of motion.

Common uses of Sculptique™ are firming and toning of the abdomen, thighs, arms, calves, and buttocks. Treatments are 30 minutes per session, with sessions separated by at least two days. Completing a full treatment series is required to maximize efficacy. Please note – it may be necessary to have additional treatments depending on your personal goals.

During the treatment you may feel intense muscle contractions in the treated area. The procedure does not require any recovery time and daily activities can resume immediately after treatment.

### Please check the box(es) if you currently have or have had any of the following:

- |   |  |
|---|--|
| <input type="checkbox"/> Metal or electronic implants   | <input type="checkbox"/> Contagious skin disease   |
| <input type="checkbox"/> Cardiac pacemakers, implanted defibrillators, implanted neurostimulators | <input type="checkbox"/> Current pregnancy, post-partum period, nursing or current menstruation  |
| <input type="checkbox"/> Drug pumps   | <input type="checkbox"/> Grave's disease   |
| <input type="checkbox"/> Pulmonary insufficiency  | <input type="checkbox"/> Metallic IUD  |
| <input type="checkbox"/> Malignant tumor  | <input type="checkbox"/> Hemorrhagic conditions  |
| <input type="checkbox"/> Cardiovascular diseases  | <input type="checkbox"/> Heart disorders   |
| <input type="checkbox"/> Disturbance of temperature or pain perception                            | <input type="checkbox"/> Epilepsy  |
| <input type="checkbox"/> Septic conditions and empyema  | <input type="checkbox"/> Recent surgical procedures (muscle contraction may disrupt the healing) |
| <input type="checkbox"/> Acute inflammations  | <input type="checkbox"/> Areas of the skin which lack normal sensation                           |
| <input type="checkbox"/> Systemic or local infection such as osteomyelitis and tuberculosis       | <input type="checkbox"/> Previous scarring in the treatment areas                                |

## Treatment Precautions & Contraindications:

- Treatment cannot be applied over the head, heart and neck.
- Pregnancy is contraindicated, and pregnant women should not undergo the treatment.
- Successful treatment outcome can be affected by smoking, excessive alcohol consumption, eating habits, and/or some medications. Maintaining a healthy diet is recommended for better results and to maintain results.
- Do not wear metallic accessories (such as jewelry, watch or clothes containing metallic threads) during the treatment.
- The paddles/applicators can be used on bare skin or over clothing.
- It is recommended to stay well hydrated after the treatment. On treatment days it's best to wear comfortable and flexible clothing and remove any metallic accessories and electronics. Avoid applying lotions and oils to the treatment area prior to your appointment.
- Certain risks are associated with Sculptique™ treatments including but not limited to muscular pain, intramuscular fat decrease, temporary muscle spasms, temporary joint or tendon pain, local erythema or skin redness, panniculitis, and increased menstrual flow in female patients.
- Treatments should not be done over injured or otherwise impaired muscles, including hernias particularly with mesh.
- Inform the treatment provider immediately if you feel any discomfort.
- Treatments may involve risks of complications or injury from both known and unknown causes, and you freely assume these risks.
- Results may vary from person to person, an exact result cannot be predicted. Completing a full treatment series is necessary to maximize treatment efficacy. It is unlikely but possible you may not feel any recognizable results after the procedure. I acknowledge the results may not meet my personal expectations.
- Individuals with metallic or electronic implants (such as pacemakers, defibrillators, metallic IUDs, etc.) cannot undergo the treatment.
