Fotona SmoothEye® is a non-invasive laser treatment to significantly tighten loose and aging skin of the eyelids and area around the eyes with little-to-no downtime and maximum patient comfort. Treatment results include improved skin elasticity, overall structure, and volume with significant wrinkle reduction.

- ✓ Immediate freshness and tightness of the area around the eyes
- ✓ Stimulates collagen remodeling & new collagen production
- ✓ Wrinkle reduction and improved elasticity
- ✓ Little to no downtime
- ✓ Gentle, fast, and non-invasive
